Congratulations! The July 1, 2009 to June 30, 2012 Educational Technology Report for Northern Lehigh SD has been reviewed and received final approval from the Pennsylvania Department of Education. The report was reviewed using criteria established by the guidelines set forth in the federal E-rate program, the federal NCLB Act Title II Part D (Enhancing Education Through Technology), and by the Pennsylvania Department of Education.

Please note that although your report has adequately addressed the sections required on a technology report, the reviewers/approvers have not compared the services and/or initiatives you have described in your technology report to your technology grants and/or E-rate applications. When applying for funds or discounts through programs that require an approved technology report, you are responsible for ensuring that your application aligns with your technology report. Be advised E-Rate and other program administrators may request a copy of your technology report to assess its correlation to your funding application. If it does not, you may at any time during the three years for which the report was approved amend your technology report using the eStrategic Planner tool. Your report is now archived and available for view only in the Report Output section of eSP (Go to Reports and click on the magnifying glass next to the Educational Technology Report, and then click "View Report". You should also keep a copy of this letter for your records.

Again, congratulations on this achievement. We hope this process has been meaningful and will provide a sound basis for your District's technology decisions over the next three years.

Sheri Rowe
